To be used for the Donor Mare.....

**APPLIED VET FEES inclusive of VAT unless otherwise stated.**

Recipient Mare Synchrony (per cycle)	<b>£360</b>
Embryo Transfer into Recipient mare (per embryo)	<b>£210</b>
Recipient Mare In-Foal Fee	<b>£300</b>
Livery costs - to be agreed with Newton Stud	

These fees include routine scans, induction hormones and routine pregnancy scans up to heart beat detection.

An endometrial swab for uterine anaerobic culture prior to AI will be taken in all non-maiden mares with a history of hypofertility or at the discretion of the attending veterinary surgeon when considered necessary (£30 for the swab + current lab fee).

Uterine lavages during Synchrony will be carried out at the discretion of the attending veterinary surgeon when considered necessary (£90 - £110) depending on antibiotics used).

If the private recipient mare is not considered suitable on the day of the embryo transfer, a Newton Stud recipient mare will be used. In this case Mare Hire Fee and Livery will be charged by Newton Stud.

Price list is correct at the time of printing (January 2023). All prices are including VAT unless otherwise stated. We reserve the right to update the price list at any time.

**TERMS & CONDITIONS**

These terms and conditions form the basis on which Equus Vets Ltd (EV) conducts itself, therefore we expect all clients to read these in full before working with us. If there are any queries about any part of these terms, please contact the office.

1. **General** Clients are responsible for all insurance cover for any horses belonging to them while under the care of EV at Newton Stud. All horses will receive all possible care and attention; however we accept no responsibility for damage, theft or disease to any animal. We also reserve the right to give veterinary assistance as we deem necessary and the client will be charged for clinical fees accordingly by the attending vet. All horses arriving at Newton Stud must be accompanied by a current passport.

2. **Health Requirements** All horses arriving at Newton Stud must be free of clinical signs of any infectious or contagious disease (including Ringworm, Strangles & Respiratory disease) and must not have been kept at a holding with any equine suffering from signs of infectious or contagious disease (specifically Ringworm, Strangles & Respiratory disease) in the last 30 days. EV has specific testing requirements for ALL horses arriving at Newton Stud (including all donors, broodmares, recipients and youngsters). Please make sure you fully understand the requirements for your horse and abide by them at all times. All horses arriving at Newton Stud must be certified free from EHV-1 & 4 (if not vaccinated) and Strangles taken no more than 30 days prior to the horse's arrival at the stud. All horses not continuously resident in the UK in the past 3 years must be additionally certified free for CEM (only mares), EVA and EIA taken no more than 30 days prior to the horse's arrival at the stud. Negative test results must be received by the Newton Stud or Equus Vets office BEFORE any horse arrives at the stud. We accept faxed, scanned or emails copies of results; we do not require the original certificate. All horses will be clinically examined upon entry into the centre. Any horse showing any signs of clinical disease will be isolated (until disease status is confirmed) or not admitted to the stud. Isolation and any treatment will be at the cost of the client. All horses arriving at Newton Stud must be up to date with Flu and Tetanus vaccinations. Where Flu and Tetanus vaccination programmes are not up to date, they will be restarted and all costs will be charged to the horse owner.
3. **AI Fees** Artificial Inseminations carried out by Equus Vets Ltd are charged on a per cycle basis. The AI fee covers routine scans pre and post insemination, all induction hormones, the insemination and routine pregnancy scans up to heart beat detection. Non routine reproductive procedures (such as endometrial swabs and uterine lavages) are not included in the AI fees.
4. **Embryo Transfer Fees** When Equus Vets Ltd carries out the donor Artificial Insemination, the appropriate AI fee (Fresh/Chilled or Frozen) is charged on a per cycle basis. Equus Vets Ltd charge Recipient Mare Synchrony and Uterine Flushing & Embryo Search fees on a per procedure basis. Non routine reproductive procedures (such as endometrial swabs and uterine lavages) are not included in the basic embryo transfer fees.
5. **In Foal Fees** A Broodmare or Recipient In Foal Fee will be charged upon the achievement of a 30 day pregnancy with positive heartbeat.

## USE OF OFF-LABEL MEDICATIONS

As first choice, horses should be treated with a veterinary medicine authorised in the UK for use in horses. However, if there is no suitable authorised product available, the Cascade may be used to prescribe an alternative medicinal product. A horse declared as non-food producing in its passport can be treated under the Cascade as a companion animal.

The Cascade is a legislative provision in the Veterinary Medicine Regulations that allows a veterinary surgeon to prescribe unauthorised medicines that would not otherwise be permitted. It is a risk based decision-tree to help veterinary surgeons decide which product to use when there is no authorised veterinary medicine available. The Cascade is based on the principle that, if there is no veterinary medicine authorised in the UK for treating a disease, the veterinary surgeon responsible for the animal may, in particular to avoid unacceptable suffering, treat the animal with a product from one of the following categories in descending order of suitability:

- a) A veterinary medicine authorised in the UK for the same condition in another animal species or for another condition in the same animal species;
- b) Either: (i) a medicine authorised in the UK for human use; or (ii) veterinary medicinal product not authorised in the UK, but authorised in another EU Member State for use in any animal species in accordance with an import certificate issued by the Veterinary Medicines Directorate (VMD);
- c) A medicine prescribed by the veterinary surgeon responsible for treating the animal and prepared extemporaneously by a veterinary surgeon, a pharmacist or a person holding an appropriate manufacturer's authorisation (so called "specials manufacturer"). Under exceptional circumstances medicines may be imported from third countries in accordance with a VMD Import Certificate.

A medicine prescribed in accordance with the Cascade may be administered by the prescribing veterinary surgeon or by a person acting under the veterinary's surgeon's direction. The responsibility for the prescription and use of the medicine remains with the prescribing veterinary surgeon.

Medications which may be utilised off-label by EV at Newton Stud, including specials and generic compounds/human drugs are: chloramphenicol, doxycycline, enrofloxacin, macrolides & rifampicin, metronidazole, ocular antibiotics, corticosteroids (including prednisolone, dexamethasone, betamethasone, hydrocortisone, triamcinolone, methylprednisolone), ocular antiinflammatories, paracetamol, esomeprazole, levothyroxine, misoprostol, metformin, amikacin, ranitidine, salbutamol, pentosan polysulphate, aspirin, acyclovir, omeprazole. Medications

specifically used off-labels in reproductive medicine include: (i) for uterine infusions/lavages - saline or Hartman's solutions, DMSO, acetylcysteine, antibiotics (procaine penicillin, gentamicin, ceftiofur); (ii) for systemic use - GnRH vaccines, antifungals (clotrimazole, fluconazole, nystatin), domperidone, pentoxifylline, buserelin, gonaderelin, goserelin, deslorelin, altrenogest.

**DECLARATION**

I have read and understood all the information provided in this form and agree to them.

I have read and understood the Equus Vets "Terms and Conditions" and "Privacy Policy" and agree to them.

I agree to the use of the listed off-labels medications on my horse(s).
